Abduction & Awareness Seminar.
September 18th 6:00 pm – 7:30 pm

This is a great opportunity to participate in a seminar that could very well help save your child's life as well as others . You and your child will be shown what to watch for and how to react to potentially dangerous abduction situations. The seminar will include a professionally produced video, hands on self-defense movements and literature that can be brought home for future discussion between you and your child. If we can save one family the heartache of this situation it would be the best hour and a half you have ever spent.
